Richard P. Tucker graphically illustrates his study with six major crops, each a virtual empire in itself: sugar, bananas, coffee, rubber, beef, and timber. He concludes that as long as corporate-dominated free trade is ascendant, paying little heed to its long-term ecological consequences, the health of the tropical world is gravely endangered.

**Project MUSE - Insatiable Appetite: The United States and ...**

Insatiable Appetite is a rich and informative synthesis of ecological, technological, business, and political history that explores the relationship between American markets for tropical goods and ecological degradation in the tropical world. Richard Tucker's deliberate use of the term "degradation" (rather than an apparently more neutral choice, like "change") makes his opinion of the results
