Microbial diversity associated to the intestinal tract of ...

Besides termites, studies of symbiosis of other species of invertebrates with microbes have also been carried out in oligochaetes, diplopods, isopods, and others (K nig and Varma, 2006). Microbial colonization acts as an indicator of high-quality food, thereby stimulating consumption (Zimmer et al., 2003).

Bacteria from the Gut of Australian Termites

C. actiniformis from three widely separated locations possessed a similar microbiota, indicating some form of control on the composition of the gut bacteria. Bacteria, capable of growth on N-free medium in the presence of nitrogen gas, were isolated from all termites, except *N. exitiosus* and *N. walkeri* , and were identified as *Enterobacter*.
