John J. Halperin, MD,a,b Phillip Baker, PhD,c Gary P. Wormser, MDd aDepartment of Neurosciences, Overlook Medical Center, Atlantic Health System, Summit, NJ; bDepartments of Neurology and

Lyme disease | Neurology

Peripheral nerve dysfunction was demonstrated in 36% of patients with late Lyme disease. Of 36 patients evaluated, 14 had prominent limb paresthesias. Thirteen of these had neurophysiologic evidence of peripheral neuropathy; neurologic examinations were normal in most. Repeat testing following treatment documented rapid improvement in 11 of 12.

John J Halperin's research works | Center for ...

Lyme disease, caused by the tick-borne spirochete *Borrelia burgdorferi*, infects the nervous system in up to 15% of patients. Involvement can include the peripheral nervous system, with a
