Netlogo: a powerful platform for agent-based models ... Because Netlogo is a high-level language specifically designed for building agent-based models, I would expect model development to proceed much more quickly in Netlogo than R (even if you factor in the learning curve for Netlogo). I would love to hear from someone who has developed agent-based models in both Netlogo and R to

provide an informed comparison.

On agent-based software engineering - ScienceDirect

The standpoint of this analysis is the role of agent-based software in solving complex, real-world problems. In particular, it will be argued that the development of robust and scalable software systems requires autonomous agents that can complete their objectives while situated in a dynamic and uncertain environment, that can engage in rich, high-level social interactions, and that can

This dissertation investigates the roles of automated software agents in two user-generated content platforms: Wikipedia and Twitter. I analyze bots as an emergent form of sociotechnical governance, raising many issues about

how code intersects with community. My research took an ethnographic approach to understanding how participation and governance operates in these two sites.
